1.1 Communication Tool 3

1.2 Client Improvements 4

1.3 Confluence Structure 6

Decisions

This page is dedicated to listing important decisions, as well as their outcomes, made by one or more stakeholders in the project.

Table of contents

3. [Confluence Structure](#)

Communication Tool

Purpose

The document outlines the various communication tools decided by the teams for use to ensure collaboration and effective communication.

Tools

Internal

- Slack -
 - A channel consisting of all teams and supervisor.
 - Each team has its own private channel.
- Zoom -
 - Team meetings are held via zoom.
- Trello -
 - Each team has its own Trello board to keep track of every member's progress.

External

- Slack -
 - A channel consisting of all teams and clients.
- In person meetings with clients
 - Held during the tutorial @Old Arts Building, Room 155.
- Gmail -
 - Meeting invites and task updates are sent via emails to all clients by the teams.

Client Improvements

This document displays all the improvements suggested by the clients.

TASKS		Tasks to be implemented in Sprint 1A (22 Mar 2021 - 29 Mar 2021)	Tasks to be implemented in Sprint 1B (07 Apr 2021 - 16 Apr 2021)	Tasks to be implemented in Sprint 1C(17 Apr 2021 - 27 Apr 2021)	TEAM
1.	Search and Insert are modes - needs to be specified in all algorithms	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Team 1
2.	Speed slider should be labelled as speed	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Team 1
3.	Click anywhere on the box to insert/ search parameters rather than just clicking on the word 'INSERT' and 'SEARCH'	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
4.	Remove the number of lines of code and have a simple progress bar instead	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Team 1
COLOR					
5.	Highlight found nodes in RED in BST	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 2
PSEUDOCODE					
6.	Recursively close the nested blocks within a parent block and fix the animation too	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Team 2
BINARY SEARCH TREE					
7.	Add some basic cases such as balanced tree, reversed tree, random, sorted tree etc. to BST	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 2
8.	Need pointers for t and p when locating the right node for Binary Search Tree	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Team 2
9.	Should have text coming up for NOT FOUND node in BST	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 2
10.	Split the tree into left and right as currently the elements fall in a straight line for BST	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Team 2
11.	Make all the details of making a "new node" in pseudocode collapsible as it takes up too much space as is (8 to 11 inclusive) in BST	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 2
12.	Highlight the node being investigated, and when you move on, to have the relevant tree edges in color	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
13.	Add explanations on the left side of the code like the other algorithms for BST	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Team 2
QUICKSORT					
14.	Alternatives for choosing pivot element (<i>need pseudocode from clients</i>) in QuickSort <ul style="list-style-type: none"> • Rightmost (the one there now) • Random • Median of three 	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 1

15.	Highlight the pivot element after its chosen (currently, it is highlighted before being chosen) in QuickSort	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Team 1
16.	Add pointers for i and j in Quicksort	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 1
17.	Display the same array as the input at the bottom but swap the elements as the algorithm is implemented such that the array becomes sorted towards the end in QuickSort	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 1
HEAPSORT					
18.	Change the labels: <ul style="list-style-type: none"> • Array view (not just array) • Tree view (not Heap) 	<input checked="" type="checkbox"/>		<input type="checkbox"/>	Team 1
GRAPH ALGORITHMS					
19.	The + and – should be labelled Graph Size	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Team 2
20.	Change LOAD to "BUILD GRAPH"	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Team 2
21.	Once graph is loaded change "BUILD GRAPH" to "RESET"	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Team 2
PRIM'S ALGORITHM					
22.	Add a priority queue at the bottom for Prim's algorithm	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Team 2
TRANSITIVE CLOSURE					
23.	Add the final graph to the animation against the code "find all nodes reachable from i via k" in Transitive closure - such that the user does not need to expand it to view the final result	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	Team 1
24.	Indicate where i, j and k are in the matrix in Transitive Closure	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Team 1

Confluence Structure

This is the CONFLUENCE STRUCTURE FOR COMP90082-2021-SM1-AIA decided by both the teams.

Pages

1. **Home INCEPTION PHASE**
2. **Requirements**
 - a. Project Overview
 - b. Functional requirements (table form)
 - c. Non functional requirements (table form)
 - d. Motivational Model
 - e. Personas
 - f. User stories
 - g. Product Backlog
3. **Ceremonies**
4. **Timeline**
 - a. Overall Plan
 - b. Sprint 1A
 - i. Sprint Backlog
 - ii. Sprint ceremonies (meeting minutes of planning, review and retrospective)
 - c. Sprint 1B
 - i. Sprint Backlog
 - ii. Sprint ceremonies (meeting minutes of planning, review and retrospective)
5. **Meetings**
 - a. Client meetings (meeting minutes)
 - b. Team meetings (meeting minutes)
 - i. Both teams
 - ii. Team 1
 - iii. Team 2
6. **System Design**
 - a. UI/Component Design of the app
 - b. Diagrams
 - i. Entity Relationship Diagram
 - ii. Use Case Diagram
 - iii. Sequence Diagram
 - iv. Wireframe Diagram
7. **Development**
 - a. Development Manual
 - b. User Manual
8. **Quality**
 - a. Software Quality Assurance Plan
 - b. Coding Standards
9. **Testing**
 - a. System testing
 - b. User Acceptance testing
10. **Decisions**
 - a. Communication tool
 - b. Client improvements v1
 - c. Confluence Structure
11. **Others**
 - a. Resources
